16. Testing and Quality Assurance

Data checks completed from raw CSV

Test ID | Test | Result | Status

QA-D01 | Row and column count | 100,000 rows / 37 columns | Verified

QA-D02 | Vehicle ID uniqueness | 100,000 unique IDs; 0 duplicates | Verified

QA-D03 | Full-row duplicates | 0 | Verified

QA-D04 | Missingness | 9,511 missing cells total | Verified

QA-D05 | Model-year range | 2018–2026 | Verified

QA-D06 | Category count | 15 | Verified

Tests still requiring execution

Test ID | Test | Method | Status

QA-T01 | KPI values match Tableau workbook | Compare filtered and unfiltered totals | Pending

QA-T02 | Dashboard public embed loads | Test clean browser session | Pending

QA-T03 | Story public embed loads | Test clean browser session | Pending

QA-T04 | Filters and highlight actions | Test every filter and reset | Pending

QA-T05 | Responsive website | Test mobile, tablet, desktop | Pending

QA-T06 | Navigation and fallback links | Click every anchor and Tableau link | Pending

QA-T07 | Accessibility basics | Headings, contrast, descriptive links | Pending

Defect handling

Record the browser/device, date, reproduction steps, expected behavior, observed behavior, severity, and resolution. A test must remain Pending until executed; do not convert pending checks into passed tests merely because the page code exists.
