Final Documentation — Electric Vehicle Market Performance & Insights

This package contains 21 **filled, detailed project documents** based on the supplied `ev_market_test.csv`, including actual dataset profiling and computed descriptive results. It is not a blank template pack.

Dataset facts used

- 100,000 records; 37 fields
- 200 manufacturers, 15 categories, 7 market regions
- 9,511 missing cells
- 0 duplicate complete rows and 0 duplicate vehicle IDs
- Model years 2018–2026

Caution

The CSV's source, sampling method, and data-generation process were not provided. Documents explicitly distinguish measured facts about this file from assumptions and avoid treating record counts as verified real-world market share. Some Tableau/browser tests are marked pending because they require live execution.

Open `01_...md` through `21_...md` for the individual documents.
